

LESTER "SPIKE" SHEPLER, JR.

PMSI*inc* Planner, Programmer and Project Manager

Project Role:

Planning, Programming, Project Manager, Team Coordination

Professional Qualifications:

20 Years Construction Field Experience

30 Years Project Management Experience

15 Years of Project Planning

Professional Experience:

Lester (Spike) Shepler has managed major construction projects for a number of Indiana based construction firms as well as for PMSI. He began his career in Land Surveying in 1971 and by 1977, expanded his interests into planning for and managing construction projects. Over the years he has honed his planning and management skills to include project programming, public relations, team relations, contract management, budget control and quality assurance.

Spike has worked with PMSI since 1993, bringing his expertise to work for our clients, giving them the hands-on service that is crucial to any successful project. Since working with PMSI he has developed a comprehensive and working knowledge of the intricacies of planning and constructing complex projects, as well as the technological aspects of modern project components.

As a professional planner, programmer and project manager, Spike provides the daily personal attention to a project that insures that nothing is left out and that the client and all team members are informed and on cue.

Spike has extensive planning, development, management and implantation experience of projects ranging from governmental, justice, medical, and religious facilities.
